at **MPTN Public Safety Building • Mashantucket, CT**

## NCSH 400 Fire Prevention and Life Safety Course

**\$885<sup>00</sup>/pp**

**Course Description:** Developed for inclusion in Keene State College Safety and Health courses in cooperation with the OSHA Education Center by Antonio (Tony) Gomes, this 5 day training course is specifically intended for safety professionals, risk managers, safety committee members, EH&S managers, fire service professionals, vendors and those who wish to broaden their education to include fire prevention and life safety.

The scope of the course will provide the participant a comprehensive working knowledge of fire prevention and life safety in the workplace. Training covers aspects of fire anatomy and behavior, characteristics of flammable and combustible materials, fire protection in buildings, codes and regulations, fire extinguishing and detection systems including types, usage and requirements, emergency planning, evacuation and emergency action plans. Included will be a historical background leading to the current day requirements as well as the many integrated codes, standards, and regulations, systems and equipment, maintenance and inspection protocols. Tabletop exercises, demonstrations and scope of required plans and programs are included.

In addition to the Fire Prevention Life Safety course certificate, an OSHA Training Institute Education Center certificate will be awarded for completion of the OSHA Course 7105 Evacuation and Emergency Planning.
