510 Occupational Safety and Health Standards for the Construction Industry

Course Description: This course for private sector personnel is a prerequisite for attendance at the OSHA 500 Outreach Trainer course, covering OSHA policies, procedures, and standards, as well as construction safety and health principles. Topics include scope and application of the OSHA construction standards. Special emphasis is placed on those areas that are the most hazardous, using OSHA standards as a guide. Upon completion of the hourly and course requirements, the student receives a certificate verifying course completion.

7105 Evacuation and Emergency Planning *

Course Description: Evacuation and emergency planning focuses on OSHA requirements for emergency action plans and fire protection plans. Preparing for emergencies is a basic principle of workplace safety and health. Participants will learn: (1) reasons for emergency action plans and fire prevention plans and when they are required for a workplace; (2) elements of a good evacuation plan; and (3) features of design and maintenance of good exit routes. The optional session for this course will focus on assessment of risk for terrorist attack and how to utilize OSHA's two matrices, Evacuation Planning and Fire and Explosion, as tools in planning for emergencies.

7505 Introduction to Accident Investigation *

Course Description: This course provides an overview of basic accident investigation procedures and describes accident analysis techniques. The objective of this course is to help participants gain the basic skills necessary to conduct an effective accident investigation at their workplace. The target audience is the small employer, manager, employee, or employee representative who, as part of a firm's safety and health system, is involved in conducting accident and/or near-miss investigations.

7115 Lock-Out, Tag-Out: Controlling Hazardous Energy to Prevent Workplace Injury *

Course Description: This six-hour course provides participants with information on the importance of energy control programs, procedures, training, audits and methods for controlling hazardous energy, and the knowledge and skills required to safely perform servicing and maintenance activities. Topics include

- the employer's role and responsibility to develop and implement an energy control program, or lock-out/tagout (LOTO)
- definitions relative to OSHA's Control of Hazardous Energy Standard
- hazardous energy sources and energy isolation options
- written program requirements
- training guidelines for authorized and affected employees
- how to detect hazardous conditions and implement control measures
- the development and implementation of energy control programs, including written isolation procedures,
- periodic inspection of energy control procedures.

NCOS-7115-N1C	March 9, 2012	F	S. Burlington, VT

7500 Safety and Health Management *

Course Description: This one-day training focuses on the effective implementation of a company's safety and health management system for new or experienced personnel, managers, supervisors, and safety committee members. Using interactive assignments and thought-provoking group projects, students of this one-day workshop come away with a strong understanding of the benefits of implementing a safety and health management system in the workplace. According to OSHA, the 2020 long-range focus is for every employer to have a functioning safety and health management program in place.
